

Our energies for a Better Life

Security Services

Bouygues Energies & Services provides manned and mobile guarding services across a wide range of customer locations with duties including; access control, external patrols, CCTV monitoring, front of house reception, visitor control and baggage scanning through to total security solutions.

Bouygues Energies & Services delivers **tailored security solutions** across a range of public (government, education and healthcare environments) and commercial properties, providing bespoke delivery models to suit each client's need.

We hold SIA approved contractor status (ACS) for the **provision of security guarding and public space CCTV services**. In addition, all Bouygues Energies & Services security employees hold the relevant licences for their roles.

Each client receives a service that not only reflects their operational and financial requirements but complements their corporate culture. Our commitment is to provide **innovative and unique methods of securing** your premises, your assets and your brand.

We are passionate about the service we deliver and as part of our approach we provide bespoke training for all guards, covering a range of topics including diversity and conflict management.

Training forms a large part of our approach to continuous improvement and is central to each employee's career development. Regular appraisals ensure that all employees receive the appropriate guidance, training and opportunities throughout their working life.

In turn, this supports our employees to understand their role in **satisfying customer needs** and assists in building strong working relationships and positive environments.

Our commitment is evidenced by internationally recognised standards and awards. These standards are rigorously and regularly audited to ensure **compliance and long term continuous improvement**, thereby providing our customers with confidence in our ability to deliver services to the highest standard.

Bouygues Energies & Services FM is a subsidiary of Bouygues Energies & Services and has held ACS since 2006.
