

Our energies for a Better Life

Biotechnology

Bouygues Energies & Services is your biotechnology partner of choice, providing turnkey facilities, process and multidisciplinary engineering services including specialist clean utilities and biodecontamination kill systems.

Biopharmaceuticals

As a design and build provider with specialist expertise in [upstream, advanced fermenters/bioreactors](#) [1], [downstream processing](#) [1] and filling/packing operations, Bouygues Energies & Services guarantees the seamless **delivery** of biopharmaceutical facilities for our customers.

Whether the requirement is for monoclonal, enzymatic, antibiotic, transgenic, gene therapy or therapeutic protein bioprocessing facilities, we have all of the in-house, [multi-disciplinary](#) [2] skills and resources necessary to guarantee product **efficacy** and **bio-safety**.

Biomass

Our extensive expertise and delivery of novel, bespoke, national facilities utilising [biomass feedstocks](#) [1] for [energy from waste](#) [3], biofuel, biorefining, biorenewables and feedstock development applications has made us the partner of choice for both **academics** and **industry** alike.
